Технические характеристики на машины для переработки отработанного моторного масла BOD компании Zhongneng

BOD Waste Oil Distillation & Converting To Base Oil System

Application:

Series BOD Waste Oil Distillation & Converting to Base Oil System can produce the base oil, diesel & gasoline from black dirty engine oil, waste lube oil, crude oil, waste plas rubber oil after through catalytic distillation.

Model:BOD-3

Brand:ZHONGNENG

Product Description

Code:8421299090

Technical Specification

Features:

1. Easy to operate, 1 ~ 2 workers can easily operate the machine.
2. Environmentally friendly in the whole operation, no smoke, no odor, without secondary pollution, the whole process is all sealed, won't release any gas harmful to human and environment,
3. Series BOD System can recycle & distill various dirty black oils including waste engine oil, lube oil, gasoline oil, diesel oil, rubber oil, plastic oil, and other lubricant oil, and convert them to diesel oil and gasoline oil.
4. High quality and quantity of refined oil obtained through output, no any discoloration caused by oxidation, no any bad smelling/ odor.
5. Low operation cost only contains followings:
 - 1) catalyst chemical, cost less than USD 30 to refine one ton of waste oil.
 - 2) Heat energy consumption: 105 kcal per ton of waste oil
 - 3) Power consumption: 40 KW to recycle 1 ton of waste oil
6. With High degree of automation in the whole operation, advanced designing and fabrication technology.
7. Adopt the water circulation method on atmospheric and vacuum distillation unit, very safe. And after decompression on the whole system, refined oil's production quantity and quality are increased obviously.
8. The whole process is performed without acid and clay which are forbidden in many countries already.
9. High effective heating system: many heating sources can be used such as natural gas, furnace oil, coal, etc..
10. Low cost: only cost about USD30 of Pre-treatment reagent when treat 1 ton used oil. The Pre-treatment reagent is basic chemical material, can buy in every country, without any restrictions.

Advantages:

This oil distillation system has Widely usage: can treat all kinds of waste dirty oil like used engine oil, diesel oil, rubber oil and other waste lube oil, also a variety of waste industrial oil to be new base oil. High recovery rate: Base oil: 85%~95%; gasoline3%; diesel:3-4%; sludge:6%~8%. Do not need acid and clay, get high quality base oil : No unsaturated composition, can storage in a long-term without change its color, also no any bad smell.

This is the most advanced technology in the world and suitable for large-scale industrial production

Item	Model Unit	BOD-3	BOD-5	BOD-10	BOD-15	BOD-30
Capacity	Tons / day	3	5	10	15	30
Recovery Rate	%	85 ~95				
Working Pressure	MPa	≤0.4				
Temperature Range	℃	80 ~280				
Working noise	dB(A)	≤85				
Power supply		380V/ 3 Phase/ 50Hz (or as per your needed)				
Electrical Power	kW	18	20	24	28	30
Cooling Method	Water Circulation Cooling					
Heating Energy Source	By Natural gas, finance oil, coal...					
Weight	Tons	6	8.5	16	29	37
Manufacture Time	Days	25	30	35	35	45
